End hunger and undernutrition

Technical Advisory Committee (TAC) Meeting
October 7, 2016
IFPRI, Washington DC
7:30 – 7:40

Roll Call and Welcome

TAC co-chairs Catherine Bertini and Stuart Gillespie
Objectives of meeting

• Review Compact2025 progress since last meeting

• Identify technical work needed to support country recommendations

• Discuss possible pathways to improve effectiveness of Compact2025

7:40 – 7:50
Update on Compact2025
Shenggen Fan
Overview: A Compact to end hunger and undernutrition by 2025

| Engaging countries | • Convening stakeholders at roundtables in focal countries  
|                    | • Completing scoping studies of focal country policies and strategies |

| Stimulating knowledge and innovation | • Creating global Knowledge and Innovation Hub  
|                                     | • Sharing experiences, challenges, and solutions within and across countries |

| Supporting initiatives and partnerships | • Supporting and mobilizing established and new initiatives  
|                                         | • Strengthening accountability mechanisms at country and global level |
## Progress since last meeting

### Recommendations from TAC

<table>
<thead>
<tr>
<th>Country level</th>
<th>Status</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. National multi-stakeholder roundtables</td>
<td>Completed</td>
</tr>
<tr>
<td>2. Country-level assessments</td>
<td>Completed</td>
</tr>
<tr>
<td>3. Support commitments to action</td>
<td>In progress</td>
</tr>
<tr>
<td>4. Guide implementation and help monitor commitments</td>
<td>To be initiated</td>
</tr>
<tr>
<td>5. Contribute to evaluation</td>
<td>To be initiated</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Global level</th>
<th>Status</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Develop global Knowledge and Innovation Hub</td>
<td>In progress</td>
</tr>
<tr>
<td>2. Act as SUN knowledge network</td>
<td>To be initiated</td>
</tr>
</tbody>
</table>
Supporting other initiatives

- National initiatives led by Ethiopia, Rwanda, Malawi, Bangladesh, and others
- Regional commitments led by the African Union and others
- International initiatives led by SUN, SNV, CARE, and others
- Global goals e.g. Zero Hunger Challenge, SDG2

Compact2025 provides evidence-based support to end hunger and undernutrition by 2025
Moving forward

• Establish country hubs to address and support implementation of recommendations

• Further develop global K&I Hub
  – E.g. engage in South-South learning

• Enhance partnerships
  – E.g. support SUN as knowledge network

• Mobilize resources
7:50 – 8:10

Accelerating Progress at the Country Level: Roundtable Discussions and Next Steps

Introduction: Teunis van Rheenen
Perspectives: Mushtaque Chowdhury, Isatou Jallow, and Vijay Sardana
Committee Discussion
Country roundtable discussions

Bangladesh
May 5, 2016
Mashiur Rahman, Economic Affairs Adviser to the Prime Minister of Bangladesh

Ethiopia
March 28, 2016
Shenggen Fan; Demeke Mekonnen, Deputy Prime Minister of Ethiopia; and Newai Gebre-Ab

Malawi
May 26, 2016
Saulos Chilima, Vice President of Malawi

Rwanda
March 24, 2016
Anastase Murekezi, Prime Minister of Rwanda and Shenggen Fan

Roundtable discussion participants
Goals

• Identify key knowledge, policy, and implementation gaps as well as opportunities, synergies, and priority areas for action

• Convene key multi-sector and multi-stakeholder actors in each country
Accelerating Progress at the Country Level

Great enthusiasm to accelerate progress

• High level commitment
• Multi-stakeholder and multi-sectoral
• Country-specific and cross-cutting recommendations
Accelerating Progress at the Country Level

Roundtable discussion results

Cross-cutting recommendations

• Make strategies, policies, and programs more nutrition-driven
• Improve coordination and accountability
• Enhance and implement policies and scale-up successful programs
• Strengthen capacity
• Fill data and knowledge gaps

Outputs

• 4 country scoping reports
• Synthesis report
Moving from roundtables to action

• Building blocks in place for action
  – Recommendations received and focal people identified

• Multi-stakeholder programs to be developed

• Implementation will require substantial resources
Accelerating Progress at the Country Level

Discussion

Next steps
• Set up country hubs
• Organize next roundtable discussions
• Further mobilize funds

Moving forward, we need to discuss how we can best
• Contribute to make strategies, policies, and programs more nutrition-driven
• Improve coordination and accountability
• Enhance and implement policies and scale-up of successful programs
• Strengthen capacity
• Fill data and knowledge gaps
Emerging Research on Investments to End Hunger and Undernutrition

Introduction: Stuart Gillespie
Introduction: Keith Wiebe
Perspectives: Prabhu Pingali and Yang Yuexin
Committee Discussion
Nourishing Millions: Stories of Change in Nutrition
Stuart Gillespie, IFPRI
Nourishing Millions: One of the first C2025 products

*Nourishing Millions* brings together the most intriguing stories from the past five decades to show what works in nutrition, what does not, and the factors that contribute to success.

Impetus for book:

• Consequences of undernutrition remain huge
• Political commitment to act has grown
• We need to understand *how* to improve nutrition and accelerate progress in the real world
1. How Nutrition Improves: Half a Century of Understanding and Responding to the Problem of Malnutrition

**Part I. Transforming Nutrition Interventions**
2. Community Nutrition Programming
3. Infant and Young Child Feeding
4. Micronutrient Deficiency Control
5. Community-based Management of Acute Malnutrition

**Part II. Transforming Sectoral Actions**
6. Agriculture
7. Social Protection
8. Water, Sanitation, and Hygiene
9. Obesity Prevention and Control

**Part III. Transforming National Policy and Programming**
10. Thailand
11. Brazil
12. Bangladesh
13. Nepal
14. Peru
15. Vietnam
16. Ethiopia
17. Odisha, India

**Part IV. Leading the Way Forward**
18. Championing Nutrition: Effective Leadership for Action
Key Lessons from Nourishing Millions

• Multisectoral nature of nutrition now well understood, but operationalizing such knowledge is more challenging.
• Validation of UNICEF/Lancet frameworks (food, health and care are all key – and synergies are possible in addressing all drivers)
• Nutrition-specific interventions can make inroads if designed, targeted and implemented in contextually appropriate ways, but addressing structural and underlying drivers is paramount in long term.
• Enabling environments need to be created, sustained and they need to progressively take on board the double burden.
• Commitment needs to be translated into action through focus on data, accountability, leadership (at all levels), capacity and sustained financing.
Scaling up Investment to End Hunger by 2030
Keith Wiebe, IFPRI
IFPRI’s IMPACT Model
Exploring alternative climate and investment futures

- Linked climate, water, crop and economic models
- Estimates of production, consumption, hunger, and environmental impacts
- High level of disaggregation
  - 159 countries
  - 154 water basins
  - 60 commodities
- Links to other global modeling groups through AgMIP, and to all 15 CGIAR centers

Hunger in 2030 by climate and investment scenario

(bars showing numbers on the left axis, dots showing shares on the right axis)

Note: 2030-NoCC assumes a constant 2005 climate; 2030-CC reflects climate change using RCP 8.5 and the Hadley Climate Model, and 2030-COMP assumes climate change plus increased investment in developing country agriculture.

Source: IFPRI, IMPACT model version 3.3, October 2016 (preliminary results from work in progress)
## Additional investment to end hunger by 2030

with climate change and a comprehensive investment portfolio

(billion USD)

<table>

News in Brief

The Compact2025 News in Brief brings together the latest updates on accelerating progress towards ending hunger and undernutrition, bad practices from all over the world are sanctioned to promote South-South learning. Nourishing Millions, a collection of evidence-based case studies of nutrition successes, is an example of one such multi-media resource.

A collection of news snippets, tools, and highlights of seminars and events relating to communicating about SDG 2 and nutrition in global

POLICIES AND PROGRAMS

Nigeria revises National Policy on Food and Nutrition to include severe acute malnutrition. For the first time, severe acute malnutrition will be recognized in Nigeria’s food and nutrition policy with a target of halving the number of children suffering from SAM by 2025.

Global Agri-business Alliance launched to contribute to UN Sustainable Development Goals. Thirty-six agribusiness companies have formed a private sector initiative to scale impact and drive change toward achieving the Sustainable Development Goals with an emphasis on SDG 2.

Rwanda: First country to sign climate change regional framework. Rwanda is leading the way on a framework that establishes the Climate Change Mitigation and Adaptation Secretariat for Central Africa, which will foster coordination, action, and knowledge within the region.
Supporting Regional and Global Initiatives

Potential ways to support

• Developing “network of networks” of experts to address on-demand requests and undertake peer review
  – E.g. supporting SUN as knowledge network

• Synthesizing lessons learned and case studies

• Creating a dashboard of key indicators

• Piloting innovations for implementation
Supporting Regional and Global Initiatives

Next steps and discussion

Next steps

• Further develop and communicate the global K&I Hub
• Establish C2025 as knowledge network for SUN

Moving forward, we need to discuss how

• The global K&I Hub can offer the most value added to global and regional initiatives
• Compact2025 can best support SUN and other initiatives
8:50 – 9:00

*Lawrence Haddad, co-chair of TAC until September 2016*
Roundtable discussion country-specific recommendations: Bangladesh

• Make strategies, policies, and programs more nutrition-driven
  – e.g. Social protection, school food programs should be more nutrition-driven

• Empower women, smallholders, and consumers
  – e.g. Interventions should target girls/adolescents with a focus on improving nutrition, access to health services, and educational status

• Fine-tune, consolidate, and operationalize policies
  – Promising plans should integrate better use of technology to improve service and information delivery while reducing leakage

• Improve coordination and engage with non-traditional partners
  – Country Investment Plan is a key rallying point, but Local Consultative Group for agriculture should be revived and frequency of meetings be increased

• Fill data and knowledge gaps
  – e.g. Regularly collected data on dietary diversity and undernutrition in urban slums
Roundtable discussion country-specific recommendations: Ethiopia

- **Fill data and knowledge gaps**
  - e.g. More sex-disaggregated and intrahousehold data needed, as well as consumption data across key groups (e.g. pastoralists, youth) and regions

- **Develop policies and accountability for better nutrition**
  - Establish nutrition financing and accountability structure; develop and communicate national dietary guidelines and framework for food safety

- **Enhance implementation and scale-up of programs**
  - Implement Seqota Declaration with built-in M&E systems and build on synergies across sectors and actors

- **Improve coordination**
  - Strengthen coordination at all levels of government with common targets and joint planning and budgeting

- **Strengthen capacity**
  - Develop nutrition curriculum for on-the-ground workers and build capacity across value chain to enhance food safety
Roundtable discussion country-specific recommendations: Malawi

- **Strengthen capacity at all levels**
  - Needed to develop effective nutrition-driven policies; capacity for national and regional research, analysis, and M&E should be strengthened

- **“Break the cycle” with holistic and market-driven approaches**
  - Pattern of food shortages met with humanitarian response must be broken and long-term, market-driven policies and approaches that focus on nutrition are needed

- **Improve accountability and coordination**
  - Food security and nutrition commitments and planning must be championed by Malawians with the government taking an active role

- **Fine-tune and implement nutrition-driven policies**
  - e.g. Investments in inefficient agricultural policies that promote solely maize production should be redirected to support more efficient, nutrition-driven policies

- **Fill data, indicator, and knowledge gaps**
  - Need for more sex-disaggregated and district specific data and data on individual/household food consumption
Roundtable discussion country-specific recommendations: Rwanda

- **Fill data and knowledge gaps**
  - Data gaps in household/individual consumption and nutritional outcomes, climate change impacts and WASH

- **Improve coordination**
  - Need for a secretariat with clear reporting mechanisms to champion food security and nutrition issues and to provide accountability

- **Enhance successful policies and programs**
  - e.g. Scale up Crop Intensification Program (CIP) and One Cow per Family program

- **Communicate and advocate for better nutritional outcomes**
  - Use media, including TV, radio, and theatre, to promote nutrition education and awareness campaigns

- **Strengthen capacity**
  - Needed at all levels; at the household level, improving knowledge on proper food preparation, further institutionalizing *Imihigo*, and sharing knowledge on nutrition can help
